DETAILED ACTION

Response to Argument

The applicant's argument has been considered with the following effect;

Applicant has amended independent claims 1, 13, and 25 to clarify that applicant's invention includes the non-permanent coupling to an external test instrument, in particular, capable of being non-permanently electrically coupled to an external test instrument. This is distinguished from Pankove's permanent electrical connection within a self contained test instrument (page 4 of remark). The examiner agrees. However, upon further search the examiner provides new ground of rejection.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Cake et al (US 5293122).

As to claims 1, 13, 25, Cake et al disclose an electrical probe (fig 1A) including A probe body (12);

A probe tip (14) mechanically coupled to probe body (12), wherein probe tip (14) is capable of being non-permanently electrically coupled to an external test instrument (throughout connector 22); and

Application/Control Number: 09/834,249

Art Unit: 2829

A control device (16 on/off switches) mechanically coupled to probe body (12), wherein control device (16 on/off switches) is capable of being non-permanently electrically coupled (22) to test instrument and

A communication port (22) mechanically coupled to probe body (12), and electrically coupled to control device (16 on/off switches) and probe tip (14), wherein communication port (22) is capable of being non-permanently electrically coupled to an electrical test instrument (scope)

As to claims 2, 14, 28, Cake et al disclose (fig 1A) the finger guard (as seen in the figure) mechanically coupled to probe body (12)

As to claims 3 - 7, 15 –19, 29 –33, Cake et al disclose the control device is a push button switch, rotary switch, track ball, joystick and includes an optoelectronic motion encoder (16 on/off switches)

As to claims 8, 20, 34, Cake et al disclose a mode display (column 2 line 5 – 15) mechanically coupled to probe body (12) and electrically coupled to test instrument visually representing a configuration of test instrument.

As to claims 9 – 12, 21 –24, 35-38, Cake et al disclose the mode display is Liquid Display (scope, column 2 line 5 - 15)

Art Unit: 2829

As to claims 26, 27, Cake e et al disclose the function of test instrument includes storing test data, and printing test data (would be perform by oscilloscope)

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jimmy Nguyen at (703) 306-5858. Any inquiry of a general nature of relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-4900.
